Analysis of Dimock well water samples

The Region 3 Lab in Fort Meade has completed the analysis of well water samples from Dimock, Pa. The project started in February and continued into March. Here are some interesting facts on the project. 286 samples were analyzed. A total of 2110 sample containers were submitted to the lab. There were 99 coolers shipped and 164 pages of chain of custody records. Additional analytical support was provided by Regions 2 and 9, NAREL and several contract labs.
